and Table of Results

Millersville celebrated the town's 150th anniversary last weekend. All weekend the town center and green were alive with activities and townspeople. The weekend started with a series of road races, sponsored by various downtown businesses and services. Anyone could participate in the races, adults or children, and some of the races were serious, while others were humorous, definitely just for fun. Each race was won by a different individual and the ages of all winners spanned over 50 years. Determine the name of each race, the full name of each winner (Sam is a man), and the age of each winner.

1. The 5-mile race and the 1-mile trial were both won by women. The 63-year-old didn't win the wheelchair roundabout. Susan's last name wasn't West.
2. The Sack Sprint was won by the 16-year-old. Mr. Panda, who wasn't 29 years old, won the Obstacle Crutches race.
3. The 1-mile Trial was won by the 10-year-old. Ken's last name wasn't Strait.
4. Sam wasn't 42 years old. Susan was younger than the 5-mile race winner. Anna King wasn't 29 years old.
5. Debi, whose last name wasn't Beach, wasn't the youngest winner. Ken won the Sack Sprint.
6. The winner of the 5-mile race was older than Debi and older than the person whose last name was West.
