Puzzles.COM

Home / Puzzle Playground / Puzzles / Mazes /

Suppose you are a Rock Climber, standing at the Mountain's foot. The Mountain consists of the rocks colored into four different colors - blue, green, red and yellow - as shown in the illustration.

Your object is to get to the Mountain's top, always climbing from one rock to another adjacent rock, but never jumping over the rocks. As you climb to the top your route must contain a definite consecution of four colors constantly repeating. For example, yellow-green-blue-red, and then again yellow-green-blue-red-, and so on.

How quickly can you get to the top?
