

VISUAL BRAINSTORMS®

Answer: No, the belts will not move freely.

Here's how: With only one belt twisted he has essentially locked all the belts. For Bruce's hamster to get his aerobic workout and have all the belts turn freely, Bruce must cross none of the belts, two of the belts or all of the belts. Crossing one or three belts will freeze all four.

 **Visual Bonus** — Do Not Turn Card Over

Bonus: What was the name of the company that manufactured Bruce's hamster exercise device? Was it: A. Hamster-Track, B. Hamster-Pro, or C. Hamster-Flex?

Answer: Hamster-Pro.
