

# VISUAL BRAINSTORMS®

**Answer:** The cube folded from this pattern is indicated below.

**Bonus:** Which of the animals illustrated on the cubes has the longest life span? Is it the pigeon, the squirrel, the duck, the turtle, the trout, or the rabbit?

**Answer:** The turtle. Generally smaller aquatic turtles can survive for at least 50 years. Tortoises live somewhat longer, about 75 years. Some of the larger species, such as giant tortoises and sea turtles appear quite capable of surviving for a century.
